UNCLE SAM AND GREATER AMERICA

From the way our Democratic friends have been acting at Louisville, one might think the destiny of the whole world depended upon the nomination of a candidate for Governor of Kentucky.

What is needed in the Philippines is 100,000 soldiers—at least 100,000 of them cavalry and 30 battalions of rapid fire artillery. And the sooner they are sent the sooner the war will end and the cheaper it will be, both as to dollars and to life.

It was WILLIAM H. SEWARD, President Lincoln's Secretary of State, who insisted that 75,000 "Yankees" could whip the whole South in ninety days. And it was mainly on account of Seward's insistence that Mr. Lincoln issued his call for that number of troops for three months service. Before the South surrendered, however, it took fully thirty times as many men and requiring fourteen times as long as Mr. Seward predicted. Unfortunately there are some men in high places today who have been laboring under the same hallucination in regard to the War in the Philippines.

"There need be no anxiety about the future of the Philippines," said Secretary Wilson the other day. "It will not be necessary to send one cent from this country to be used in their government, as the customs receipts will be sufficient to meet everything, including the expenses of the army if there had been no delay in ratifying the treaty of peace hostilities would not have broken out, and by this time great strides would have been taken in developing the islands. Little can be done in this direction while hostilities are in progress, but the Philippines are learning that we will be respected. Much in general has been said about the conditions there, but little specific information has been given to the public.

"According to the reports of agents of this Department, the health and climatic conditions are about as good as in the States. The soil is like that of Illinois, and while that state has only 30 inches of rainfall, the Philippines have 120. The mountains are filled with gold, iron, coal, manganese and other minerals, and woods grow in profusion, and as all of the island of Luzon has not been explored, no man can tell what riches are stored there. It is said there is more gold in the Philippines than in the Klondike.

"I see 4,000 of our soldiers want to be discharged and allowed to settle there. This is a good indication, as they will form a home guard. They will be very American wises and settled down to make their fortunes. When Yankee enterprise, pluck and ingenuity take hold of the Philippines the development will be rapid, and these islands will prove of great value to this country."

Chairman Redwine Refuses a Motion to Eject Policemen From the Convention.

IT WAS DESIRED BY HARMON MEN.

They Prevented Further Balloting for Governor by Singing Songs, Shooting, Etc.

Redwine Refused to Allow an Adjournment—Finally, the Gabel and Stone Factions, by a Vote, Took Two Ballots and Adjourned.

LOUISVILLE, Ky., June 27.—Chairman Redwine called the democratic state convention to order at 10 o'clock Monday. Trouble started at once. Congressman Hines at once mounted a chair, and in three seconds declared that he would return to Major Weaver for his police protection. He then declared the democratic convention in twenty years I have been in where police were required to keep order.

He would up by moving that the police be released to leave the hall and be asked the aid of the counties on the motion.

Redwine refused against him, and he appealed from the chair's decision. Redwine refused to entertain the appeal. He ordered the secretary to begin the roll call for the first ballot.

Delegates Hines, Sweeney, Thompson, and Mitchell, all Hines men, were mounted chairs and excitedly declared that they would break up the convention if the chairman did not act firmly.

Every delegate was on his feet. Chairs were upset, and the scene was a riotous one. The session of last week began when a delegate yelled, "Hurrah for Redwine!" The Hines and Stone factions shouted, "Down with Redwine!"

When shortly shouted at the chairman: "You are not dealing with bodies. You are dealing with men."

"Go after him, Hines," called many delegates. The disorder continued.

The Hines and Stone men now mounted chairs and excitedly declared that they would break up the convention if the chairman did not act firmly.

John Shepherd, Who Assaulted Mrs. Jones, Seen in the Vicinity and Officers Will Attempt His Capture—The Negroes Will Oppose Violence.

BIRMINGHAM, Ala., June 27.—Two armed bodies of men were holding determined vigil near Cardiff, in this county, Monday night. One body is composed of white men, officers of this county, and the other of Negroes.

A special train just in from Cardiff says everything is quiet. Citizens feared trouble Monday night.

WARD FROM OTIS.

He Came to the War Department the R at Situation in the Philippines.

LITTLE CAMPAIGNING BEING DONE.

Our Troops, Says the General, Are Worked to the Full Limit of Their Endurance.

The Relief Season Has Paralyzed the Movements of the American Troops—Insurgent Armies Proceeding Great Loss and Wasting.

WASHINGTON, June 27.—Gen. Otis, in reply to a cable from the war department, asking for information regarding the situation and conditions in the Philippines, Manila, cabled a long reply as follows:

MANILA, June 26.—Adjutant General, Washington: Rainy season. Little inland campaign possible in Luzon. We occupy important Tagalog country, lines stretching from Imus south, to San Fernando, north nearly six miles, and eastward into La Guana province. Insurgent armies have suffered great losses and are scattered; only a large force held together about 4,000 men. Tarlac province and northern Pangasinan. Their scattered forces in the mountains of 50 to 600 in other portions. Luzon: In Cavite and Batangas provinces could assemble possibly 2,000, though demoralized from recent defeat. Masses of people terrorized by insurgent soldiers. Desire peace and American protection; no longer feel to approach our troops unless forced by insurgents, but gladly welcome them; no recent burning of towns, population suffering from lack of medicine, taking up land cultivation extensively, kept out of Manila as much as possible as city population becoming too great to be cared for.

Natural southeast Luzon combining to drive out insurgents. Only insurgent leaders in United States. They proclaim near overthrow present administration, to be followed by their independence and restoration to United States. This is the influence which enables them to hold out much contentment prevails among them and no civil government remains; trade with them is in our possession, for our source of insurgent revenue, now interdicted; not certain of wisdom of this policy, as people in those parts are without supply of food and merchandise, and our troops are meditating restoring trade privileges, although insurgents reap benefits. Courts here in successful operation under direction of a Filipino.

Affairs in other islands comparatively quiet, awaiting results in Luzon. All anxious for trade and repeated calls for American troops received. Among states not in our archipelago and Palawan Islands, our troops have worked to limit of endurance. Volunteer organizations have been called in, replaced by regulars, who are occupying important positions in Nebraska, Pennsylvania and Utah now taking transports and 6th Infantry sent to Negros to relieve California. These troops in good physical condition, slight amount of sickness, but increasing, due mostly to malarial fever and climatic influences. Nothing alarming of the 12 per cent. of the command reported sick, nearly six in general hospital, of whom 100 per cent. have typhoid and 12 malarial fevers; 25 per cent have intestinal troubles; remaining 55 have various ailments, 11 of which due to wounds. Many other troops men who served in Cuba break under recurrence of Cuban fever, and regular regiments lately received are inadequately clothed.

Oris.

Inadequacy of the number of officers mentioned in last part of cablegram has been remedied by the sailing of the transports Zealandia and Sheridan, carrying a number of officers for regiments in the Philippines.

Adj. Gen. Corbin says that all officers belonging to regiments in the Philippines who are not absent on account of a surgeon's certificate, are under orders to join their regiments at once. Forty-four officers have sailed on the recent transports going to Manila.

Secretary Aldrich said Monday that no action would be taken for the enlargement of the army, or send troops to reinforce Gen. Otis until the return of the army service buildings.

Gen. Wheeler would receive no assignment until that time.

Would Not Suffer So Again for Fifty Times its Price.

I awoke last night with severe pains in my stomach. I never felt so bad in my life. When I came down this morning I felt so weak I could hardly work. I went to Miller & McCurdy's and they recommended Chamberlain's Colic, Cholera and Diarrhoea Remedy. It worked like magic and one dose freed me. It is the best I ever used for stomach trouble. I shall not be without it in my home hereafter, for I should not know where to find the suffering of last night again for fifty times its price.—G. H. Wilcox, Livermore, Burgettstown, Washington Co., Pa. This remedy is for sale by J. Jas. Wood & Son, Druggists.

FLOTSAM—JETSAM—LIGAN!

BEWY NOTES FROM NATURE'S GREAT HIGHWAY.

The Queen City will be up tonight for Pittsburgh. The Henry M. Stanley is slated for Pomor tonight. The Cranial will attend to Cincinnati business tonight.

The Arcion was down yesterday from headwaters of Kanawha.

There is a slight rise coming out of both rivers at Pittsburgh.

Ever pilots may ask for a raise in their wages when the river convolution takes place.

Several river engineers who examine the boiler at Davis Island claim that blow up say that there was not sufficient water, etc. William Martin, the resident engineer, denies this. The boiler had not been inspected for a year. The boilers at the Government locks on the Monongahela are inspected by the lock inspectors.

The first movable dam in America was built at the Great Kanawha river, it is 100 feet long, 10 feet high and is located respectively fifteen and nine miles above Charleston, on the Great Kanawha river, were completed and put in operation in July, 1901, and were the first movable dams in connection with slack water navigation built in America. In addition, it is not only a dam, but a dam of slack water navigation of the Great Kanawha river is probably the most complete and satisfactory of that on any stream in this country. The system is composed of two fixed dams at the upper end of the river, and two movable dams on the remainder of the river. Davis Island at Pittsburgh was completed in 1901. All these movable dams are of the same type. There is no dam No. 1 on the Kanawha river. The series commences with No. 2 and runs on to a few fixed dams.

Captain Harry F. Hodges, United States Engineer in charge of the improvements of the Kentucky river, as well as some of the other important tributaries of the Ohio, is now located at his office in the Custom House at Cincinnati yesterday for the construction of locks across the Kanawha river, which is now being built as far as possible, and on June 26th will open his office for the construction of the dam at that point. All these dams and locks across the Kanawha river are completed, and Captain Hodges says it is probable that the Kanawha river will be navigable before the middle of the coming winter, if no serious drawbacks are encountered. Six more locks and dams are projected for the Kentucky river to make the river navigable to Beattyville, and appropriations have been made for the completion of the same and for the purchase of the site for No. 10. The site for No. 10 has not been acquired, however. The height of Dam No. 10 is feet. All the dams on the Kentucky river are stationary.
